RING SIZE GUIDE

To find out your accurate ring size, please print out this page at 100% - Please make sure you do not opt for automated scaling in your printer settings.

Double check the page was printed correctly by comparing the printed ruler with another ruler that you own. The two should match up exactly in order to achieve accurate ring size measurements.

If print scaling is correct, you may choose one of the two options below to measure your ring size!

OPTION 1

Place a ring that fits you on the circles below. Your ring's inside edge should match the outside layer of the circle - That's your size!

OPTION 2

Cut out this strip of paper and cut a slit along the dashed line. Pull the end of the strip through the slit, wrap it around your finger and read your size at the slit.
